Professional Summary

Software Engineer with experience in backend and security engineering, MERN stack development, REST API development, and full-stack application design. Currently working as a Junior Engineer in Security & Backend Engineering at Digiscrypt Technologies, following an engineering residency. Skilled in JavaScript, React.js, Node.js, Express.js, MongoDB, MySQL, authentication, authorization, Git, and API integration. Experienced in debugging, code reviews, secure application development, and building responsive web applications. Strong foundation in data structures, algorithms, object-oriented programming, and software engineering practices.

Technical Skills

Programming Languages: JavaScript (ES6+), Java, C, Python
Frontend Development: React.js, HTML5, CSS3, Bootstrap, Tailwind CSS, Responsive Web Design, DOM Manipulation
Backend Development: Node.js, Express.js, REST APIs, JWT Authentication, Role-Based Access Control (RBAC), MVC Architecture, CRUD Operations
Databases: MongoDB, Mongoose, MySQL, MySQL Workbench
Security & Engineering: Secure Authentication, Authorization, Code Reviews, Debugging, Software Testing, Basic Security Reviews
Tools & Platforms: Git, GitHub, Postman, VS Code, Netlify, Linux (Basic)
Core Concepts: Data Structures and Algorithms, Object-Oriented Programming, Asynchronous JavaScript, API Integration, SDLC, Agile Development, Problem Solving

Professional Experience

Digiscrypt Technologies Oct 2026 – Present
Junior Engineer – Security & Backend Engineering *Sirsi, Karnataka*

- Working on backend engineering and security engineering assignments, including internal tools and project-related development under the guidance of an Engineering Lead.
- Contributing to code reviews, debugging, software reliability, and security reviews as part of the engineering workflow.
- Collaborating with engineering team members to develop, review, and maintain software components while following established coding practices.
- Applying backend development and software engineering fundamentals to support maintainable and reliable applications.

Digiscrypt Technologies Jun 2026 – Oct 2026
Software Engineer Resident – Backend & Security Engineering *Hybrid*

- Participated in a structured engineering residency focused on backend development, software security, and practical engineering workflows.
- Reviewed and debugged code to identify defects and improve code quality, reliability, and maintainability.
- Used Git-based collaboration workflows, including branching, pull requests, code reviews, and merging changes.
- Contributed to repository-level engineering tasks and collaborated with team members under technical mentorship.

Vtricks Technologies Feb 2026 – May 2026
MERN Stack Developer Intern *Bengaluru, Karnataka*

- Developed responsive web application interfaces using React.js, JavaScript, HTML, CSS, and Bootstrap.
- Worked on full-stack application functionality, including frontend-backend integration and REST API workflows.
- Practiced DOM manipulation, asynchronous JavaScript, debugging, API testing, and Git-based development.

Projects

Namma Khate – Shop Management PWA Aug – Sep 2026
HTML, CSS, JavaScript, Progressive Web App, Netlify

- Developed and deployed a mobile-first Progressive Web Application to digitize daily operations for a local retail store.
- Implemented tracking for cash collections, inventory purchases, customer credit dues, and profit calculations.
- Built a weight and price calculator to simplify billing and reduce manual calculation effort.

- Live Demo: nammakhate.netlify.app

Pharmacy ERP – Inventory & Billing System 2026
React.js, Node.js, Express.js, MySQL, Tailwind CSS

- Built a full-stack pharmacy management application for inventory, purchasing, sales, billing, customers, and suppliers.
- Developed REST APIs for inventory management, stock updates, billing workflows, and business operations.
- Integrated React.js interfaces with backend APIs and MySQL database operations.
- Implemented GST invoice generation, stock tracking, and automated workflows for pharmacy operations.

AI Clinic Platform Jan – Feb 2026
React.js, Node.js, Express.js, MongoDB, JWT

- Developed a healthcare management platform with authentication and role-based access for patients, doctors, and medical learners.
- Implemented appointment management, doctor approval workflows, medical report uploads, and patient management.
- Created REST APIs using Node.js and Express.js with MongoDB for persistent application data.
- Designed responsive dashboards for appointment and medical report management.

Document Forgery Detection System Apr – Dec 2025
React.js, Node.js, Express.js, Python, Machine Learning

- Built a full-stack document verification system supporting document uploads, authentication, and protected routes.
- Integrated Optical Character Recognition (OCR) and machine learning techniques for document analysis, similarity checking, and potential forgery detection.
- Developed backend APIs for document processing and result management using Node.js and Express.js.

Education

SDM Institute of Technology 2022 – 2026
Bachelor of Engineering in Computer Science & Engineering; CGPA: 8.14/10 *Karnataka, India*

Certifications

- The Complete Web Development Training – Udemy
- Data Structures & Algorithms using Java – Coursera
- Build Your Own Generative AI Model
- Internet of Things (IoT)
- Database and SQL

Achievements

- National-Level Sepak Takraw Player: Represented Karnataka six times in national-level competitions.
- State-Level Sepak Takraw Player: Represented Karnataka eleven times in state-level competitions.
